

## All About Duro-Last

Duro-Last has met or exceeded all of the major fire and wind code requirements, as well as regional approvals necessary throughout the country. Duro-Last has:

- been approved by Factory Mutual as a **1-60, 1-90, 1-105, 1-150 and 1-210** roofing system,
- has passed wind uplift tests up to **210 psf**,
- is listed by Underwriters Laboratory as a UL Class A material,
- is approved by the code agencies BOCA, ICBO and SBCCI for use in their jurisdictions,
- is a “charter partner” of the Energy Star® Roof Products Program and
- participates in all of the major technical committees in the roofing industry, plus the American Society of Testing Materials (ASTM).

### Product Information

- The Duro-Last membrane is classified as a co-polymer alloy and is a proprietary thermoplastic formulation consisting of:
  - resins and plasticizers,
  - stabilizers,
  - biocides,
  - flame retardants and
  - U.V. absorbents.
- The membrane is laminated to a weft insertion knitted scrim.
- The membrane is available in
  - White,
  - Tan or
  - Gray.

### Product Sizes

For ease of handling, as well as reduced field seams and installation time, Duro-Last dielectrically welds material in large sheets up to 2,500 square feet as specified by architects, contractors or installers. The system weighs **.25 lbs. per square inch**.

## **Accessories**

Duro-Last produces a complete line of standard and custom prefabricated accessories. These accessories incorporate the same membrane as the roofing sheets and are made in the factory rather than labor intensive field fabrication on the roof.

### **Standard Accessories Include:**

- round pipe flashing
- inside and outside corners
- two-way roof vents
- roof drain liners
- drip edges
- gravel stops
- termination bars and fascia with covers and clips

### **Custom Accessories Include:**

- large, round pipe flashings
- parapet wall flashings
- scuppers and flashings for all types of roof penetrations

## **Safe Materials for Use on Duro-Last**

- Acrylic Paint
- Ash Residue
- Copper Sulfate
- Detergent
- Ferric Chloride
- Fertilizer
- Fiberglass
- Fruit Juice
- Lacquer
- Lard
- Latex Paint
- Linseed Oil
- Masonry Cleaner
- Muriatic Acid
- Oleic Acid
- Polypropylene
- Sodium Hydroxide
- Zinc Chloride
