

Choosing Your Roofing System

When choosing your roofing system and company, look for:

- A reputable company with over 25 years of service and stable ownership
- Corporate commitment to improving the roofing industry & industry systems
- Vertical integration – makes all membrane components (no private labels)
- Strength in roofing details – pre-made flashings
- A predictable, efficient installation process
- Proven wind resistance
- Performance beyond the warranty period
- Strong, welded seams – no glue or sealants
- Energy efficient – white in color
- A user-friendly process – predictable in all weather
- Proven vented design – release building and dew point moisture while neutralizing wind pressure
- A serviceable membrane – able to be modified or repaired
- Dependable field service
